

SOVEREIGN AI & FORWARD-DEPLOYED DELIVERY STUDIO

Why 80% of Enterprise AI Pilots Fail

And how modern Forward-Deployed Engineering teams cut client delivery from 3 months to 14 days with zero cloud data leaks.

THE ZERO-ADMIN PORTABLE DELIVERY STUDIO

Automate data plumbing, visualize 2D/3D schema topologies, transpile legacy Oracle/T-SQL, and scaffold client deployments directly in VPCs.

Portable .exe (Zero Admin Rights)

2D & 3D Schema Topology & Column Linking

Oracle/T-SQL Transpiler & 26-Lang Modernizer

Executive Reporting & Sandboxed Dashboards

🚀 PRIVATE ENTERPRISE PILOT PROGRAM

FOCUSED COHORT ONBOARDING · DIRECT SUPPORT →

WHERE TRADITIONAL AI STALLS IN CLIENT VPCS

The 3 Enterprise Blockers

Most pilots don't fail on model capability. They fail on IT installation friction, compliance bans, and tedious migration drag.

1. The IT Admin Rights Barrier

4-8 WEEKS LOST

Enterprise security blocks IDE plugins and third-party installers on client-managed laptops. FDEs burn weeks waiting for IT procurement tickets just to install basic developer tooling.

2. The Cloud SaaS Compliance Veto

BLOCKED BY INFOSEC

Proprietary banking schemas, customer PII, and production SQL cannot touch external SaaS endpoints. Cloud-dependent AI coding assistants fail bank-grade data sovereignty reviews immediately.

3. The Legacy Migration & Plumbing Sinkhole

MONTHS OF DRAG

Engineers waste 80% of pilot time manually rewriting decades of legacy Oracle PL/SQL & T-SQL into modern Snowflake/BigQuery, hand-crafting schema mappers, and writing retry glue.

LIVE INTROSPECTION & VISUAL TOPOLOGY

Interactive 2D & 3D Schema Topology

Introspect live enterprise databases in seconds. Explore massive 265+ table schemas in responsive 2D ERD and 3D Celestial orbit.

2D Technical ERD & 3D Celestial Orbit Dual Mode

265+ TABLES AUTO-FIT

1-click toggle between a high-density 20x14 technical ERD grid and an interactive 3D Celestial orbit. Auto-fits massive enterprise schemas with dynamic bounding-box scaling and zero canvas rendering lag.

Column-to-Column Relational Linking & Isolation

[PK] → [FK] HIT-TESTING

Precise illuminated cubic bezier lines linking exact primary keys to foreign keys with dynamic pin sockets. Hover for instant join cardinality; click to isolate joined tables and dim unrelated noise to 4% blueprint ghost opacity.

Live DB Introspector & Sample Inspector (7 Engines)

ZERO-LEAK SAMPLING

Direct read-only introspection across **Postgres**, **Snowflake**, **BigQuery**, **SQL Server**, **MySQL**, **SQLite**, and **ClickHouse**. Inspect live sample rows, test join integrity, and compile production **dbt staging models** in minutes.

ENTERPRISE MODERNIZATION POWERHOUSE

Automated SQL Transpiler & 26–Lang Engine

Save hundreds of engineering hours on legacy migrations, access governance, and synthetic pipelines.

Oracle & T–SQL Transpiler

Converts complex legacy Oracle PL/SQL & SQL Server T–SQL directly into **Snowflake** and **BigQuery** dbt models with tests, macros, and schema validations.

26–Language Code Modernizer

Production-grade AST idiom translator modernizing legacy COBOL, C#, Java, Python, and SQL into idiomatic cloud-native code with zero mock implementations.

Row–Level Security (RLS) Gen

Generates production multi-tenant isolation and Row–Level Security policies across **Postgres**, **Snowflake**, and **BigQuery** with zero manual scripting.

Synthetic Data & Mock APIs

Generates referentially intact synthetic datasets (Customers, Invoices) and zero-dependency mock REST servers in Node.js & Python for offline staging.

MULTI-CLOUD IAC & EXECUTIVE DASHBOARDS

Multi-Cloud DevOps & Executive Dashboards

Bridge the gap between data pipelines, production cloud infrastructure, and boardroom executive sign-offs.

Multi-Cloud Terraform HCL (GCP, AWS, Azure)

IAC PRODUCTION CODE

Auto-scaffolds complete infrastructure as code: secure VPCs, private subnets, least-privilege IAM roles, Cloud Run / ECS services, BigQuery datasets, and S3/GCS buckets.

Automated CI/CD & GPU Kubernetes Manifests

4 PLATFORMS

One-click pipeline generation for **GitHub Actions**, **GitLab CI**, **Bitbucket Pipelines**, and **Azure DevOps**—complete with container Dockerfiles and GPU node-selectors.

Data Analysis & Sandboxed Executive Dashboards

BOARDROOM READY

Isolated iframe canvas previews for interactive HTML reports, live KPI metric ribbons, and native print-optimized PDF styling for immediate client sign-off.

ZERO TRUST • ZERO TELEMETRY

Air-Gapped & Banking Security Architecture

Engineered specifically to satisfy strict bank-grade, defense, and enterprise healthcare audit standards on Day 1.

Ed25519 Offline Licensing

Hardware-bound cryptographic signatures with compiled master public key. Zero phone-home licensing servers. Operates permanently air-gapped.

Portable .exe (Zero Admin Rights)

Runs directly as a standalone portable Windows executable (74.7 MB) with no admin rights, no registry modifications, and zero cloud dependencies.

In-Flight PII Sanitizer & SIEM

Automated real-time sensitive data masking and tamper-evident audit log forwarding to **Splunk**, **Datadog**, or **Microsoft Sentinel**.

Data Quality & Integrity Gates

Automated **Great Expectations** & **Soda Core** validation runners with Databricks Lakehouse Unity Catalog lineage tracking.

SPEED TO IMPACT

From Months of Drag to 14-Day Delivery

Traditional Manual Delivery vs. Evolve AI Forward Deployed Engineers Delivery Studio.

DELIVERY DIMENSION	TRADITIONAL MANUAL FDE	EVOLVE AI FDE DELIVERY STUDIO
IT Tooling Approval	4-8 Weeks (Admin rights & MSI)	Instant (Portable .exe, No Admin)
InfoSec & Air-Gap	Rejected (Cloud SaaS LLMs)	Day 1 (100% Air-gapped / Local VPC)
DB & Schema Ingest	5-10 Days (Manual DDL scripts)	<15 Minutes (Live 7-DB + 2D/3D ERD)
Legacy Modernization	Months of manual PL/SQL rewrite	Minutes (SQL Transpiler & 26-Lang Engine)
Cloud & DevOps Scaffolding	1-2 Weeks manual Terraform	1-Click (Multi-Cloud DevOps Hub)
Time to Client Handoff	3-4 Months average	<14 Days Confirmed

FAST-TRACK YOUR DEPLOYMENT

Deploy Your Next Pilot in 14 Days

Join our focused pilot cohort to equip your Forward Deployed Engineering team with dedicated technical onboarding and direct engineering support.

1

Comment "PILOT" or Message Directly on LinkedIn

Leave a comment below or send a direct message. Our Sydney engineering team will provide your evaluation access, the architecture brief, and technical walkthrough support.

2

Download the Portable Studio (.exe)

Visit evolveminds.com.au/products/evolve-ai/ to download the zero-install Windows desktop executable (v2.22.0) with an instant evaluation mode.

3

Direct Inquiries & Technical Feedback

Contact our Sydney engineering team directly at contact@evolveminds.com.au for confidential architectural briefings or custom enterprise deployments.
